

## How to Update the Firmware of ROG KERIS WIRELESS AIMPOINT for ROG Omni Receiver Compatibility?

1. **Download the Firmware:** Start by downloading the appropriate firmware for the ROG KERIS WIRELESS AIMPOINT.
2. **Unzip the Firmware File:** Once downloaded, locate the file named 'FirmwareAutoUpdate\_1.0.0.17' and unzip or extract its contents.

3. **Initiate the Firmware Update:** Double-click on the extracted firmware update executable file.

*Please be aware of the following:*

- Ensure that the ROG KERIS WIRELESS AIMPOINT is connected to your system during the update process.
- Your keyboard and mouse can only be paired with a single Omni Receiver at a time. If you wish to connect them to another Omni Receiver, re-pairing both devices via Armoury Crate will be necessary.
- Firmware version above is for reference only. Please download the latest version through 'Driver & Utility' – 'BIOS & FIRMWARE'.
