- Asus Update (v7.16.01)

Steps for Self-Upgrade

Remark:

- (1) Please upgrade step by step shown in SOP file. If not following steps, your operating system might not be upgraded successfully or even be crashed.
 - (2) If you encounter with any problems during installation, get in touch with ASUS Support Contact shown at <http://support.asus.com/contact/contact.aspx?SLanguage=en-us>
1. Under Windows® XP in your Eee Box PC, upgrade BIOS via Asus Update (Windows XP version).
 2. Install Windows® 7 operating system via DVD purchased by yourself.
Remark: The same language version as your Windows XP operating system is required.
 3. Install required driver step by step as below:
 - 1) Chipset Intel 945: Run Setup.exe
 - 2) VGA Intel: Run Setup.exe
 - 3) Audio: Run Setup.exe
 - 4) LAN: Run setup.exe
 - 5) Wireless 766 or 785: Run Setup.exe in the folder of “Install_CD”
 - 6) Card Reader: Run setup.exe
 4. Install Asus Update: Run Setup.exe
