

User Manual of “SV3U326 Write EEPROM (MP)” EndUser V1.1

After executing the application
“SV3U326WriteEepromMP_20170314_v1p6_EE_ASUS_EndUser_HS_ONLY.exe”,
it is going to pop-up a dialog like Figure 1

Figure 1

If you accept “Don’t Power-off your system when you’re downloading the firmware!”,
please click the button “Yes (Y)”. Otherwise, click the button “No (N)”.

After you click the button “Yes (Y)”, the main dialog will show like Figure 2.

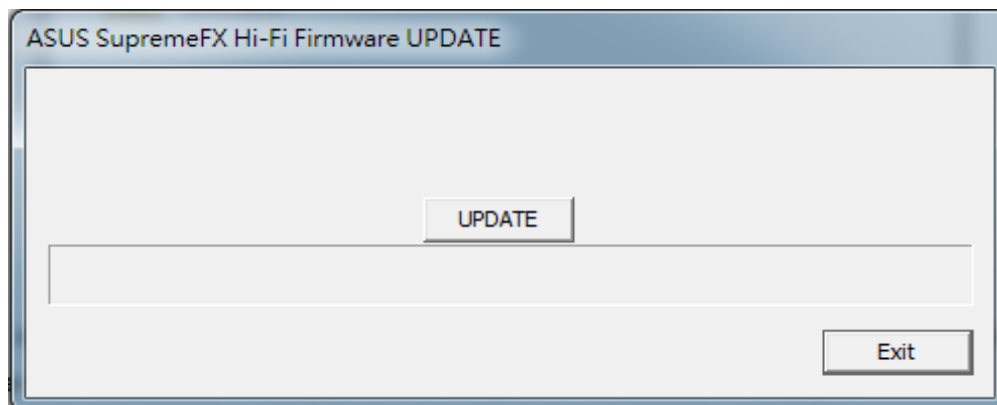

Figure 2.

When you click the button “**UPDATE**”, it will pop-up a dialog like Figure 3.
You should re-plug in USB device’s power and **MUST** wait for USB device being recognized!
Then press “OK” button, it will continue writing EEPROM!

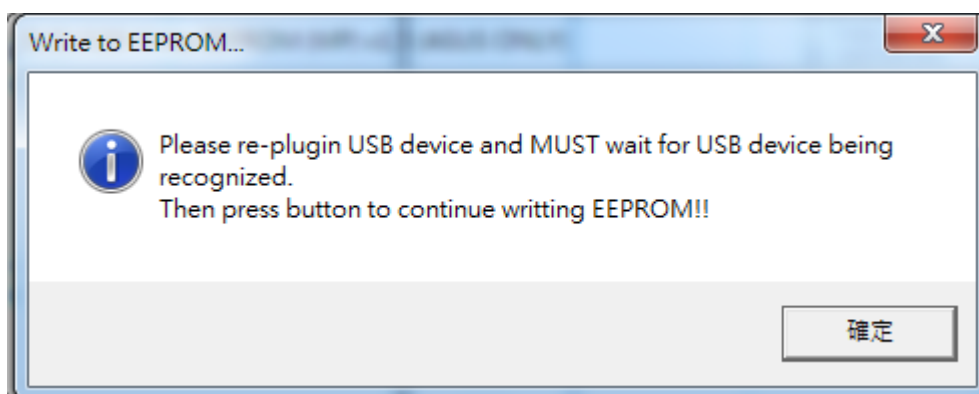

Figure3

The device is downloading the firmware like Figure 4.

Figure4

After finishing writing all data to EEPROM, the application is going to pop-up a window like Figure 5.
