

Technical Updates

This is an information update for the user guide that comes with your motherboard/system package.

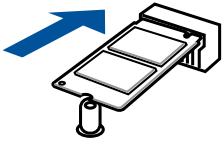

Installing M.2 card

To install an M.2 card:

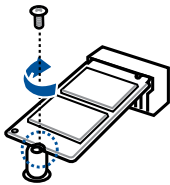

1. Locate the M.2 connector (NGFF1) on the motherboard.
2. Remove the screw on the stand screw.

3. Align and insert the M.2 card into the M.2 connector (NGFF1).

4. Secure the M.2 card with the screw you removed in step 2.

- Please pay attention when removing the screw, the stand screw might be removed together with it.
- Ensure that the M.2 card is positioned between the screw and the stand screw before securing it.
