Z11PA-D8 series are built on the Intel Xeon Scalable processor, which features higher per-core performance and four memory channels that provide 50% more memory bandwidth and capacity for 1.65X faster average system-level performance than previous-generation processors. The Intel Xeon Scalable processor also delivers better virtualization performance, enabling 4.2X more virtual machines (VMs) per system.

FEATURE

- Powerful performance with Intel® 1st and 2nd Gen Xeon® Scalable processor and ECC memory
- High-speed storage interface support with dual OcuLink for NVMe
- Increased performance with an M.2 (NGFF) 22110 slot
- Connect up to 16 SATA 6Gb/s storage devices

High-speed storage interface support with dual OcuLink for NVMe

Dual OcuLink for efficient connections to NVMe devices

Z11PA-D8 series features dual onboard OcuLink to provide efficient port-to-port connection with most OcuLink-supported NVMe devices, eliminating the need for PCIe transaction cards.

Connect up to 16 SATA 6Gb/s storage devices

Z11PA-D8 series come with four mini-SAS HD connectors that support up to 16 SATA ports each for high-speed 6Gb/s connectivity with external devices and cleaner cable routing.

CEB Motherboard with ATX Mounting Holes

Z11PA-D8 series support dual Intel Xeon Scalable processors in a compact, 12"x 10.5" CEB form factor. It also features ATX mounting holes, so you choose from a robust ecosystem of ATX cases instead of specially made, proprietary chassis, and benefit from up-to-date server technologies, even on a limited IT budget.
