Chapter 1 ASUS Data Security Manager

1.1 Introduction

1.1.1 Introduction

Nowadays in the world there is secure network, anti-virus to protect system, and all that, but how about securing data in the case of theft? What is the best way to secure the data on notebook? It is easy to think of password and encryption; we can use encryption software for confidential data. Here is data protection software from ASUS: ASUS Data Security Manager, it uses a traditional method: lock the data.

P ADSM provide:

- Protect your private & important file.
- Simplify complexity
- Single Password for a user
- Hint of password
- Auto Logout 5 min

1.2 How to use ASUS Data Security Manager

1.2.1 Create vault without a window user account

1. Click Start \ All Programs \ ASUS Utility \ ASUS Data Security Manager or the shortcut on Desktop.

2. Then on desktop will show widow below, please choose "I agree" and "Next".

4		-
~ Read carefully the terms and condition 'I Disagree'	ns in the License Agreement. Select 'I Ag	ree' or

3. Please enter password and confirm password, then press "ok"

r Vault File Tools Help 🖬 🖗	- ×
Create User First	Create User Password Enter Password: Tenter Password: Tenter Password: Tenter Password: Tenter Password Hint WARNING: You should close ADSM before leaving this computer After 3 minute(s) of inactivity, the system will logout automatically.
	Ok Cancel

4. There are three default vault on the window,
∇ Safe Doc
∇ Safe Music
∇ Safe Video
Please choose File→Create Vault

ly Vault
