2.3 Mouse Tracking

Please right click the MultiFrame icon and choose "Mouse Tracking". After new windows division, mouse tracking feature of MultiFrame let you easily find your mouse and executing windows.

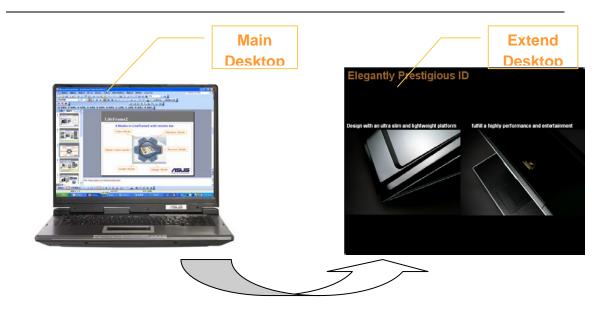

2.4 Desktop extend

Please right click the MultiFrame icon and choose "Enable Extended Desktop".

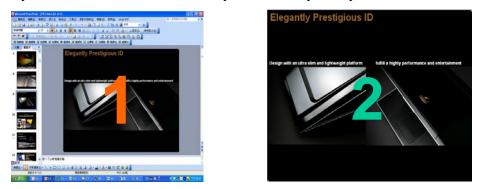

Extend Windows of MultiFrame is very useful while doing presentation. You can see your memo at your NB screen and present another file at projector and keep your private & confidential file only existed at your NB screen.

2.5 Show monitor ID

Please right click the MultiFrame icon and choose "Show Monitor ID". It will show Monitor ID to indicate the main monitor and the secondary monitor even you use the same 2 monitor, so you can easily verify them.

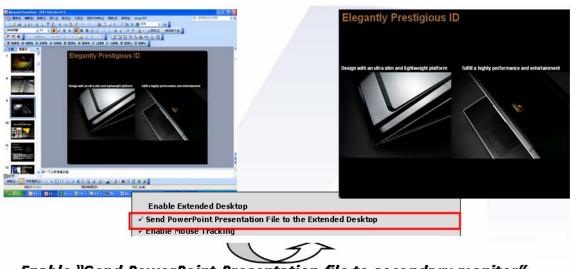

2.6 Send PowerPoint presentation file to secondary

monitor

Please right click the MultiFrame icon and choose "Send PowerPoint presentation file to secondary monitor".

It's very useful while doing presentation, you can easily show what you want to present and hide others you don't want to show yet.

Enable "Send PowerPoint Presentation file to secondary monitor"

If you disable the function, the PowerPoint presentation won't present in the extended desktop
