Powerful performance with Intel Xeon® W-1300 family CPUs and ECC memory

Pro E500 G7 is built on the Intel W580 chipset and comes with a choice of the latest Intel Xeon® W1300 family or 11th Generation Intel Core™ CPUs. With Intel Xeon, Pro E500 G7 delivers powerful, optimized performance for always-on usage scenarios and supports error-correction code (ECC) memory for automatic detection and repair of single-bit memory errors, reducing the change of system crashes and data corruption to ensure reliable and responsive workstation performance.

Graphics card support

Pro E500 G7 supports NVIDIA Quadro Pro graphics cards, making it the perfect workstation for content creators, media streamers and professional designers

Dual LAN support Intel 2.5Gb Ethernet port for faster data-transfer speeds

2.5G on-board Ethernet kicks your Ethernet connection up a notch with an up to a 2.5X bandwidth improvement for a significant speed upgrade over traditional Gigabit LAN connections. Using your existing Ethernet cable, you can take advantage this networking upgrade to experience smoother, lag-free gaming, immediately stream high-resolution videos and enjoy faster file transfers.

Supports up to three independent displays simultaneously

Designers rely on multiple displays for more efficient and comfortable productivity. Pro E500 G7 comes equipped for total display flexibility with support for up to three independent displays via HDMI, DisplayPort, DVI-D and VGA, perfect for multitasking environments.

Dual M.2 for up to 32Gbps performance and data redundancy

Pro E500 G7 features dual M.2 slots to unleash maximum data-transfer performance. One M.2 slot supports up to 22110-length M.2 drives via PCIe Gen4 x4 for ultrafast data access. The other M.2 slot is suitable for SATA drives or Intel® Optane memory via PCIe Gen3 x4 to speed up traditional hard drives.

Improved productivity with ASUS Control Center

Pro E500 G7 features centralized IT-management with ASUS Control Center (ACC), a comprehensive control platform with a user-friendly interface that provides access to all of your workstations from anywhere via your mobile device. It is designed to improve system reliability, facilitate easy updates and provide seamless integration for small to medium-size business and enterprises for increased productivity

Independent software vendor (ISV) certification

Independent software vendor (ISV) software is becoming an important factor to users in variety of industries. ASUS works in close partnership with ISV vendors, such as Adobe and Autodesk, to test and verify compatibility. This ensures ASUS workstations are reliable and highly effective for users in different fields.
